## The Kim Home

14

The spare beauty and the subtle blend of interior texture, color and light were inspirations for each piece of art created for the Kim Collection of Domsy Glassworks. Los Vegas artists Barbara and Larry Domsy have spent 16 years making extraordinary works of art through a variety of glass and metal working processes. Three pieces, taking approximately six months to complete, were created especially for this home. A recently designed fourth piece has been installed in the foyer.

Each large, brilliantly colored, handcrafted piece is created using an innovative blend of hot glass and glass fusion techniques. Integrated metal frames complete the process. Placed at the outer entrance of the home, "Balance," a large glass and steel wall sculpture, instills a sense of stability and harmony. The calm colors and gentle movement of the tri-composition glass painting, "Tranquility" evoke a state of relaxation and form a connection between the home's decorative water elements and the nearby ocean view. In using a rich palette of vibrant colors in their intricate design of "Wisdom" for Mr. Kim's office the artists seek to evoke a strong, masculine sensibility that reflects its energy back to the viewer.

Domsy glass art also graces several Las Vegas resorts, City of Hope Hospital, the offices of the Tiger Woods and the Andre Agassi Foundations and the Cirque Du Soleil.
